Jerwin Babatugon

Full-Stack Software Developer

Cebu City, Philippines | +63 968 575 3536 | jerbabats@gmail.com | zymith123.github.io/portfolio

PROFESSIONAL SUMMARY

Full-stack software developer with 3+ years of experience building and maintaining web applications across the frontend and backend. Skilled in Vue.js, Nuxt, React, Next.js, Node.js, NestJS, and Scala (Play Framework), with hands-on experience in PostgreSQL, MySQL, and MongoDB. Experienced in designing AI-powered automations that connect business tools using n8n, Zapier, and Make.com. Comfortable collaborating with backend and cloud deployment teams to deliver responsive, cross-browser-compatible applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Frontend: React, Next.js, Vue.js, Nuxt 3, AngularJS, Quasar, Tailwind CSS, HTML, CSS
Backend: Node.js, Express, NestJS, Scala (Play Framework), REST APIs
Databases: PostgreSQL, MySQL, MongoDB, H2, Prisma
Cloud & DevOps: Git, Docker, Linux, Google Cloud Platform (GCP), Cloud SQL
Automation & AI: n8n, Zapier, Make.com, Apify, Claude, Google Gemini, GitHub Copilot
Testing & Tools: Postman

PROFESSIONAL EXPERIENCE

Software Developer — M Lhuillier Financial Services Inc. *Sep 2025 - Present*

- Developing the frontend for a revamp of the company's Disbursement Application using Next.js and React.
- Implementing a transaction cancellation flow for the internal Billing System.
- Building reprinting logic for pawnshop transaction receipts.
- Coordinating with backend developers on Node.js/NestJS and MySQL APIs to integrate frontend features.
- Collaborating with the GCP deployment team to ship releases.

Software Engineer Trainee — Vauldex (Pre-Employment Training Program) *Feb 2025 - Jun 2025*

- Completed an intensive training program covering frontend and backend web development, including real-world projects and technical evaluations.
- Built responsive interfaces using Vue.js and Nuxt.js; developed backend services with Play Framework (Scala).
- Contributed to an Attendance Management application, implementing authentication, attendance tracking, and reporting features.
- Gained hands-on experience with PostgreSQL and H2 for database design and management.
- Collaborated with a team on frontend-backend integration, debugging, and performance optimization.

Front-End Web Developer — Medspecialized, Inc. *Aug 2022 - Jan 2025*

- Built and maintained front-end websites for the company and its sister companies using modern web technologies.
- Developed a Food Ordering App with Vue.js for internal employee meal orders.
- Built an Onboarding App with Nuxt 3 to streamline new-hire processes.
- Enhanced an internal Course App using AngularJS to improve user interaction.
- Rebuilt a Task Tracker App for an India-based team using Quasar, improving performance.
- Used Postman and MongoDB to test and verify database changes; occasionally updated backend APIs and controllers during debugging when backend developers were unavailable.
- Ensured cross-browser compatibility and responsive design across all projects.

SELECTED PROJECTS

- **ShineOps - Owner dashboard SaaS for recurring cleaning businesses.** Built with Next.js, PostgreSQL, and Claude AI integration to score client health, flag at-risk accounts, and convert feedback into follow-up tasks.
- **CryptoPulse - Crypto paper-trading app for risk-free trading practice.** Built with Nuxt 3, TypeScript, and the Binance API; tracks roughly 490 Binance USDT pairs with an equity curve and trade history.
- **Invoicely - Local-first invoicing and payment tracker.** Built with React, TypeScript, and Tailwind CSS; supports multi-currency invoices, partial payments, and a lightweight client CRM with no backend required.

EDUCATION & TRAINING

Bachelor of Science in Electrical Engineering - Cebu Institute of Technology - University, Cebu City, Philippines (2015 - 2019)
Full-Stack MERN Developer (Bootcamp) - Zuitt Coding Bootcamp, Philippines (2020 - 2021)
