Work Experience

Jehan Corporation

2021-2022

Site Engineer

- Make surveys on the field to produce a plan for the project and implement them with proper standards.
- Communicates with client through email, phone and on-site troubleshooting for product quality and performance concerns to immediately resolve any issue and improve after-sales service of the organization.

Medspecialized, Inc.

2022 - Present

Front-End Web Developer

- Built and maintained the front-end of websites for the company and its sister companies using modern web technologies.
- Developed and enhanced key apps:
 - Food Ordering App: Created with Vue for employee meal orders.
 - Onboarding App: Developed with Nuxt 3 to streamline new hire processes.
 - Course App: Improved with AngularJS for better user interaction.
 - Task Tracker App (India): Recreated using Quasar for better performance.
- Used Postman and MongoDB to modify databases and verify outcomes.
- Occasionally updated backend APIs and controllers during debugging when backend developers were unavailable.
- Collaborated with teams to deliver responsive, user-friendly web applications.
- Ensured cross-browser compatibility and adhered to coding best practices.
